Notifications & Emergency Alerts

METLAKATLA INDIAN COMMUNITY **RESIDENTS**

MIC's new system for sending important notifications and emergency alerts!

This program will be used to send emergency notifications out to the residents of Metlakatla to alert the community to an emergency or other life threatening or dangerous event so that people can be informed as quickly as possible so people can take appropriate steps to be safe.

It may also be used to send notifications to alert all residents or those in a certain area of town to an emergency such as a fire, active shooter, natural disaster, chemical spill, or other crisis. It may also be used to inform residents if there will be water or power shut offs in certain areas of town.

Opt in today!

**Do not have a cell phone? Don't worry, we can send alerts to
your landline as well.**
